Subject: opportunities that are misused

Message: Today's Micronesian Youth have wide variety of opportunities but we're too spoil. We have good education but it seems like not all the youth go to school. We come to school and not all of us try our very best then ended up repeating the courses and slowing down the chances of earning our degrees. We have the support from US (the financial benefits) to continue our education and yet when we recieved the refunds we tend to spend them on unnecessary things which leads us to expel from school. We have many many more benefits but it is not us who make them existed that is why we have to make use of the good times and the opportunities because for sure they are going to be out of our sights and we're all going to be in trouble in the future if we don't make use of the opportunities.

Subject: Differences Today!!!

Message: When I see Today from the past, which elder people told me about, there is a very great difference. In the past, our people work very hard to support families, friends, and other people within the society. We see them as hard workers, but to them, everything is simple. Navigation, fishing, building house are just simple chores in a day. But for us today, we ate to walk, but to drive a car, or a taxi which cost \$1.00. A dollar can safe a family for 2 to 3 days. Of course our life maybe different today, but what about preservation. Our Society needs to safe what we believe to be important because we have no hope of what we are having today. The past don't have sufficient needs, but they knew how to use them. For us today, we really waste.
Be smart, recycle!!! thankyou

Subject: My Hopes and Dreams

Message: As a Micronesian youth, I feel that my hopes are low but I kept on dreaming about my future. I say this because I think I don't have the resources and tools that I need to prepare fo my future. This is the reason why I choose to come here (C.O.M.-F.S.M) for my first two years in college. Right now, I'm hoping to graduate with the resources and tools that I need so that I can go to other institutions well prepared.

As for my dream, its the same old dream that many people dreamed about. The dream to have a happy and peaceful life in the future. Meaning, having a good job and other things that are necessary for a peaceful and happy life.

Subject: Our future!!

Message: I guess most of us here have heard about what's going on in this young nation. Many times we have heard about leaders threatening to secede from this nation and now we have another island working its way inside to become a new state of the F.S.M. What do we, young people, as the future of this nation, think about such movements. Would it be possible for one state to secede from this nation? What are the good sides and the negatives about a new state in this federation. We, as young current educators of today, are the future.. WE should have a say in such movements..We can not just stand beside and let the veteran players play the game..we as rookies should do something if we think that such acts are threats to our future..i don't know what do you think..

Subject: do you think micronesian history is a better future for C.O.M students?

Message: well in my own idea, i think that micronesian studies involved everything happened to us during these years....from the last decades many people think that micronesian studies are for those americans that want to find out the lost treasures from the last few decades but i think that we are wrong...the micronesian study is the best future for us....it teaches us how to connect with the people and our culture...try to compare our own culture with the other islands in the pacific ocean....studying micronesian ways can lead you to a better future... so what you think are you with me??..

Subject: we are the prior of the future!

Message: Life is hard and we must think that we are going through this life in everytime. But there is a answer to the life that we had today. Love the people beside you as you love your dad and mom.

Students of micronesia think that we are growing up and never fall down again. Please understand that the modern life is harder than the life that our parent had in many years ago.

What we pran today will come true in the future if we try our best to occumplish it. However, keep our nation in peace so that we will come up with the right situation as we dream today...

Subject: Yesterday or Tomorrow?

Message: Everything from yesterday had been gone and I knew what is right or wrong. Learning from yesterday had increased my knowledge of being well to the journey of tomorrow. My experience in "being well" was a strong self-defence in my everyday life and I believe that this could help me to accomplish the mission from the College of Micronesia. Not only in Micronesia,..but whenever I go..One of my friend had a poem and i'd like to share it with you..

Cherish the moment of yeaterday and
Follow the dreams of Tomorrow.

My own opinion is through tomorrow which are:
The hope, the will,the generation,the children, and many other of tomorrow, otherwise i will fail!
Please help to support tomorrow!

of tomorrow

Subject: Purpose for majoring in Micro History.....

Message: My kajor is MICRO HISTORY,I like this because i like to study about my own island lifestyle and the behavior of my own people.Another reason is,most micronesian young man and women are becoming to forget about their own culture in their own land,which we all know that culture is the most important habit that we used in everyday life.So,I like this major cause I want to teach about the history of Micronesia in the future so that our next generation will know the creation of their own land and try to tell the future generation of their own.THANK YOU

Subject: The Worst Fear....

Message: In this world, as we grow, there are no fear we have, worst than standing up in front of people and deliever speech. Of Course, we have fear in death or getting stab on the heart, by a thousand knives, but it's not worst than deliver a speech in front of people. This include telling others about your personal life, which is the worst fear part. I believe that one day, all of us will have an opportunity to stand up or tell others about problems, so therefore, we should start prepare and practice on doing it. Do you know anything that we people have fear with?

Subject: Different experiences

Message: Todays youth experiences are very different from their grandparents'generation in so many ways.One thing for sure is the level of education that their parents have.Most of todays youths grandparents were living during the Japanese reign in Micronesia.Japanese school before went only from 1st grade to 5th grade. The school rules was so hard and the punishment was so out of this world. I remembered my grandma telling me that the students were beaten up with bamboo sticks if they happen to break the rules.As students,they have their homeworks to do and some other works they also do for the Japanese.If they don't do the jobs they were told to do, they would be beaten up for not doing so. Once they have graduated from the fifth grade,they would then go work in the hospitals as nurses and the others would work for the Japanese govt. Nowadays,no students would ever be beaten up in school for we have certain laws that goes against such action. Also today we go from many levels of school before we become nurses or government workers. We should be thankful to our grandparents for bearing those hardships that they faced then,now as the new generation,we are able to experience the many great opportunities that the world offers.

Subject: Premarital Sex

Message: I believe you know what is Premarital Sex. I came up with this because i believe it's one of the major problem that is happening in Micronesia. Getting pregnant when you are young and when you are not married is not a good idea. This idea will push you out of school and you could be infected with any kinds of diseases. Just do not practice, wait until your time comes. Don't be rush, because it is a duty and responsibility given from god.

Please reply by answering this question:

As a college student, are you ready to have baby or are you ready to be a father and a mother?

Subject: To Be Successful Or Not To Be Successful!!!

Message: Today Pohnpei have been overpopulated. And many young aged people like me are not in school. Maybe they are dropped out or their parents don't even care to encourage them to go to school. But the child knows what's right for him/her. They should look at their friends that are attending school and be like them. The decision is in their hands. It is up to them to go to school or not to go to school, "to be successful or not be successful". They should use their friends that are in school as their role models.

In the small community that I am residing in there are many young people about my age that are not in school. Everyday they just hang around and do nothing.... just smoking weed. They don't have any job. What if they happen to get married? What will they feed their families. So I tried to avoid them so that I won't get caught in their path. I always think about my future and to tell you my future comes first before everything. I wanted to be successful and have a good life.

Before I conclude this short letter I hope that everyone that read this to please before doing any silly, thing think about your future first or you won't become what you wanted to become... see ya in the future..

Sincerely,
Ram-Z

Subject: Is it better to live "modern" than not to live "modern"?

Message: Is it better to live modern than not to live modern?

To answer the question above may result into different answers. People's opinions differ in many ways, but to answer this in my own opinion, I would say that it is better to live in modernity than not to live in modernity at all. I mean who wants to fall far behind? Living in modernity is somewhat like a conformity. Everyone is living in modernity and yet what country or nation would want to live without modernity. Every nation or country is striving to be on the top, it's more like a competition! Many that once lived in the so-called-subsistence economy may deny the good things this modernize world benefits them but if only they would admit it. A person cannot say that he is living in a subsistence economy if he/she has not own a dollar and spent it. I mean money is all part of modernity.

Subject: Concerns for Present and Future

Message: As a college student I am concerned about the hard work ahead of me to continue my education to get a bachelors degree and then a masters degree, and who knows, maybe even a PhD. It's still a long road ahead with several years of courses and instructors and hard work. I try to take it one semester at a time otherwise it looks like a pretty huge unreachable goal.

I am also concerned about world peace in the future. I don't want us to have to live in fear and I wish the world's many nations would learn to work their problems out instead of going to war with each other. I'm also concerned about environmental problems such as global warming, sea level rising and the depletion of the ocean's fish resources.

After college I'd like to be able to get a good job, raise a family and live in a peaceful world with a healthy and clean environment on land and sea.

Subject: what are their hopes and dreams?

Message:

I think our hopes and dreams today as a pohnpeian students, we want to control all the office on pohnpei. Not only the office, I meant the whole government in pohnpei. Especially we want to control the education. As we the students the students from pohnpei see today not many teachers are from pohnpei, they came from different places. that's our hope and dreams today we want to control and take over our own government. This is our hopes and dream as a student and citizen pohnpei state.

Subject: Opportunities to be pursued

Message: Micronesian youth of today are bombarded with many great opportunities. Rating from 1 to 10, education won by the latter. We are so very fortunate to be in the midst of all these great opportunities. So why don't we all strive to acquire a much better education than what our parents were offered then? We have grants that the U.S government is giving to enable us to further our education. As in today's world, a better education goes hand-in-hand with a better life. Fellow citizens....get up, arm your self with a better education and you will surely succeed in the future where everything will be education-linked. Goodluck to you all.

Subject: United State in Micronesia

Message: The United States has been a good supporter for the island of Micronesia. On the other hand it has done some things that are really shameful. For instance, the testing of bomb in the Marshall islands on Bikini Atoll. That affected most of the people who live there as well as those who are affected by the radio active. For this reason I would like to recall an article so called United States in the Pacific islands. This article talked about the United States reasons for hold on to the Micronesia islands after the war. Some of the reasons are military advantages which include bomb testing, outpost, and military base. In return, they pay for the compact. So why should we be fooled. I mean as we looked around do they really want to develop our economy? Can they develop our economy? The compact is finished. We should keep this question in mind as our leader renegotiate the compact.

What do you think about the message is right or wrong? Please reply!

Subject: Differences Between the Experiences of Micronesian Youth Today and their Parent's

Message: Micronesian youth today and their experiences differ a lot from their parent's and their grandparent's. Today as we all may understand is a different world. It is a world of advanced technologies and new approaches to problem solving. Many youth are experiencing situations that their parents had never been near before. Traveling to other countries for education is a fair example. My grandparents to be specific, had a faint idea of what the outside world looked like or even more accurate what they seemed like. That is because they did not care about it. What they had is what was kept. They knew all the techniques required for catching a fish, and they kept it. They did not absorb new technologies. Micronesian youth today are experiencing strict governmental rules and regulations. Sometimes as I, a Micronesian youth, would be driving our car on the street with my grandmother, she would always tell me to stop by at any place, house or store and at anytime for her to do something. I would tell her that I couldn't but she persisted. That proves to me that she had a faint idea of what the regulations and rules are for driving on the street today. Furthermore, the regulations involve not stopping at anytime and anyplace you want in order for the prevention of car accidents. That is universally understandable. Today, Micronesian youth are also experiencing freedom and freewill. We have our own choice towards many situations and we are free to choose. Parents sometimes try to exercise strict authority over us and try to make decisions on behalf of us but we do understand that it's a different world. I think some reasons why parents try to practice those rules on the youth today is because strict rules are being applied on them by their own parents. Long ago parents practiced severe authority over children and they were able to control them. That may be because of the low population as well and controlling children was very successful. As of today, things really change. Some parents may advise their children to do this and that, go there or some place else but after all Micronesian youth today understand that there is freedom and that they are living under democracy where everyone's voice in the government is accepted.

Subject: Alcohol and Drug Awareness Week

Message: I would like to comment on this week's activities. I think this week's activities is a lot helpful to students at our College. It is good because those students who are using drugs, use drugs without knowing the bad effects or side effects of it and with this week's information being offered and presented to them, now they know. After that is their own decision. To decide what is best for them. Also this week's activities is good because it also makes the alcohol and drug users to think twice, so they can quit. I think every school in Pohnpei, should have their own week of alcohol and drug awareness. I mean this is one interesting way of teaching them about drugs and alcohol. You know, the poems, the stories and with all those activities presented through alcohol and drug awareness week it motivates. Or if not, then I think, we should invite schools to join us on our yearly alcohol and drug awareness weeks to come. What do you think?

Subject: The effects of September 11th on the FSM

Message: The September eleventh tragedy all seemed to be the United States own problem. Many people in our small islands of the FSM, thinks that "well, it's their war." Yes it's their war, I mean we didn't seemed to have any involvement in it. All we do is sit in front of the TV set and watch "their war," and we talk about the war. But what about the effects the war might have on us. Our small Islands and our government structure. I mean think about the Compact. The United States is our main source of income and all that moves our economy. Our hospitals, our schools, our everything may be closed down. I mean they may be so busy in war and forgot about us, the small islands in the Pacific. With this too, the renegotiation of the compact. I mean it's scheduled or so I heard to be renegotiated this year 2001. Tomorrow is november first and still nothing happened. This year is about to end and still no renegotiation done yet.

Subject: Doubt

Message:

There's an island of the state of Chuuk that demand our FSM congressmen to give them statehood. Do you think this is a good idea? Just imagine a tiny island to become a state. They even threaten our congressmen of becoming a souverien nation if our FSM congressmen won't give them statehood. This is what I am afraid of. If we do not give them statehood and if they are to desperate to become a nation of their own, then they will then seek other countries to help them. The war going on right now, if these people do not get statehood, don't you think they will seek aid from these people. Remember, we are part of the free association nations...

Subject: Difficulties from modernity

Message: Today, Micronesian youth are hopping and dreaming to be educated to have a better and brigther future life. Is it a good idea to educate Micronesian youth? This is an interesting question to me. In some cases, Micronesian youth worry and fear the low standard of the education system in Micronesia and the decreasing level of money and income in Micronesia. Micronesian youth think that we need support from the industrialized countries. It is us, the new generation of Micronesia, that will experience and face the challenges of modern life. This new generation is one hundred percent different from our parent's and grandparent's generation, which we need education to survive.

Subject: opportunities micronesia youths have and problems to face!!!

Message: As a student of the College Of Micronesia, there are many opportunities that we have and there are also problems to face. The opportunity that I have here is that I can use computer and use internet to find anything that I need and also use internet as a tool for communication. Another opportunity that I have is that the U.S government is supporting me. Since the College of Micronesia is here in Pohnpei, I have an opportunity to stay with my parents and relatives. I also have the opportunity to share my ideas with my brothers and sisters from the states of the Federated States of Micronesia. The problem that I need to face is my education. I need to work hard at this time so that I can be able to continue my education somewhere in the U.S. Another problem to face is to stay away from drug while in education. Education and Drug cannot go together at the same time.. While in education, you need to play smart. You know what to take and not to take while you are in college. Think about your future!!! Therefore be wise in choosing things or else you will end up Zero.... These are the opportunities that I have and the problems to face While I am in College right now..

10/30/01 - 16:25:21

Subject: fears and worries of micronesia youth.

Message: Everyone fears and worries about their future. What they are going to do and what are going to happen to them? I fear that I might cannot finish my education because of money problem. Now it is good that the U.S government is helping us paying my tuition and other stuffs. What about if they stop sending us money? Where will I get that much money to cover all my tuitions?? Here at the college of micronesia one credit costs \$75.00, five classes cost \$1125.00. Where will I get this amount of money in every semester. Since my parents are not working for the government of Pohnpei, I am afraid that the U.S will stop sending us money.. I am worried about what if the U.S government stop sending me money to cover all my tuitions. I am worried that I am going to quit coming to school and stays at home everyday. What will be the result? I will be jobless and cannot have a better future. This is what I really feared and worried as a micronesian youth..

10/30/01 - 15:58:46

Subject: What are their hopes and dreams

Message: As for us the micronesians especially the pohnpeians, our hopes and dreams is to take over the government of Pohnpei. I know it will be much more better if the youth controls the government because we are familiar with the lifestyle of this generation. While in education, sometimes we encounter problems that our leaders have created for us. Since we have gotten along this kind of problem, we want to change it. Nowadays only the old age people are running the government of pohnpei and if they allowed youth to get involve, the government will improve. They are only thinking of what the old people need and ignoring the need of the youth. This is the hope and dream that I really like the youth of pohnpei to be after five years...

Subject: good education = success

Message: Every Micronesian is unique in his own special ways. Each has his own dreams, own hopes, own problems, own ideas or solutions, etc...

In order to make that dream come true, one has to get a good education and put a lot of effort into it by studying hard and applying what he has learned in school to real life.

Studying and doing school work is actually not that fun, but it will definitely pay off in the end.

With good education comes a good, successful future! ^^

10/28/01 - 22:31:36

Subject: Present dreams for the future.

Message: As a youth, my biggest dream is one that will be beneficial to myself and the people of Micronesia.

This big dream is to someday become a doctor here in the FSM. I understand that in order to make this dream a reality, I have to put forth a lot of effort and sacrifice a lot, and it won't only be for a short period of time, but for years. Sometimes I wonder if I am really capable of achieving this goal, and I get discouraged along the way. A person that I looked up to (my mentor) once told me to look at the big picture, and not at the minor details that discourage me, or sometimes serve as obstacles. Every obstacle can be overcome. To conclude, I just want to say that this is the biggest hope I have when things become like a burden on my shoulders.

Subject: Worries and Fears of Micronesian Youth.

Message: There is never a life without fear or worries. Every living soul long ago and in today's generation and of course in the future had, have and will have something fearsome or worth worrying. A soul may fear a ghost. Another may fear death. Still, others may fear starvation, poverty and illness, but all of these are none of my concern. However, Micronesian Youth in today's generation have something in common that they really fear a lot. In whatever they see, whatever they do, say, and even hear, they will fear the one most thing that is worth it, failure. I believe that most of the Micronesian youth today are engaged in some kind of education for the betterment of his or her future. These youths are also aware that their future is in their own hands and it depends mainly on how they do in such a crucial event, education. So, some may start worrying about how to enroll if they haven't done so, others may worry about the available financial aids and how to improve them and still others may worry about how they are going to do in education. Finally, if the youths are enrolled already, they will start to fear the ending. They are afraid of failing courses and not succeeding in achieving a degree or certificate. Their future is affected in such a case. This is also applied to other activities, sports for example. If one doesn't win, he failed and this is what today's youth are trying to avoid or this is what they fear.

Subject: Hopes and dreams of Micronesian youth today.

Message: Today's Micronesian youth seek for a better future. They hope for a future that will be of good fortune to them. They dream of being active in government issues and to earn better occupation in terms of high salary and profit. In fact, not all the youth in today's generation have the same hopes and dreams, but similar. Some may possess such future expectations as mentioned above and others may expect more than that. As a Micronesian youth myself, 20 years of age, I hope and I always dream of being active especially in government related activities. I want to carry out a future occupation that will not only benefit myself, but others that depend mainly on my doings like my family and the people under the F.S.M government. I also hope to take on a wide role that stretch beyond the involvement of just the F.S.M government, maybe becoming a lawyer and working both for the US government and for the F.S.M government. Finally, Micronesian youth look forward to extending their knowledge on today's happenings in order to acquire a clear path to social, spiritual, psychological, and biological development in the future and it is evident by the way they are moving along today and by what they are experiencing, going to school and solving daily problems, to be specific.

Subject: Harmony with the NATURE!

Message: Before I carry on I want to say that the things I wrote are all opinions. I think that the most concern or important to us youths of this generation is to help safe or control the nature of our environment. Living the traditional way with western life style is the modern ways of living of most Micronesian college students. Which is better? I think both is best for now a days since most destroys things in nature needed advance knowledge and technology to recover them. For instance, studying the biology of marine organisms, (getting an education – western life style) knowing how to safe them is for the health and wealth for the just developing countries (such as Micronesia) to carry on traditional ways. Simplification: Using advanced technology to safe our environment is to help us carry on traditional ways.
